

S1903 | MEDIAN INCOME IN THE PAST 12 MONTHS (IN 2013 INFLATION-ADJUSTED DOLLARS)

2013 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Puerto Rico			
	Total		Median income (dollars)	
	Estimate	Margin of Error	Estimate	Margin of Error
Households	1,253,690	+/-9,187	19,183	+/-313
One race--				
White	71.5%	+/-0.5	19,459	+/-427
Black or African American	8.5%	+/-0.4	18,463	+/-1,154
American Indian and Alaska Native	N	N	17,963	+/-3,365
Asian	N	N	10,089	+/-3,767
Native Hawaiian and Other Pacific Islander	N	N	-	**
Some other race	10.6%	+/-0.4	17,437	+/-781
Two or more races	8.6%	+/-0.4	20,447	+/-1,191
Hispanic or Latino origin (of any race)	98.9%	+/-0.2	19,128	+/-308
White alone, not Hispanic or Latino	0.7%	+/-0.1	30,559	+/-9,237
<b>HOUSEHOLD INCOME BY AGE OF HOUSEHOLDER</b>				
15 to 24 years	2.6%	+/-0.3	7,962	+/-1,890
25 to 44 years	28.8%	+/-0.4	22,018	+/-794
45 to 64 years	38.9%	+/-0.4	22,195	+/-591
65 years and over	29.7%	+/-0.3	15,629	+/-457
<b>FAMILIES</b>				
Families	895,080	+/-9,229	22,698	+/-413
With own children under 18 years	39.9%	+/-0.8	20,588	+/-769
With no own children under 18 years	60.1%	+/-0.8	23,900	+/-430
Married-couple families	56.9%	+/-0.8	30,219	+/-602
Female householder, no husband present	34.3%	+/-0.8	13,899	+/-725
Male householder, no wife present	8.9%	+/-0.4	17,373	+/-1,188
<b>NONFAMILY HOUSEHOLDS</b>				
Nonfamily households	358,610	+/-8,397	11,133	+/-370
Female householder	56.3%	+/-1.1	10,283	+/-447
Living alone	49.6%	+/-1.1	9,462	+/-349
Not living alone	6.7%	+/-0.7	24,805	+/-4,792
Male householder	43.7%	+/-1.1	12,260	+/-568
Living alone	37.6%	+/-1.1	11,264	+/-543
Not living alone	6.1%	+/-0.7	22,240	+/-3,208

Subject	Puerto Rico			
	Total		Median income (dollars)	
	Estimate	Margin of Error	Estimate	Margin of Error
PERCENT IMPUTED				
Household income in the past 12 months	27.5%	(X)	(X)	(X)
Family income in the past 12 months	28.9%	(X)	(X)	(X)
Nonfamily income in the past 12 months	21.9%	(X)	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

In data year 2013, there were a series of changes to data collection operations that could have affected some estimates. These changes include the addition of Internet as a mode of data collection, the end of the content portion of Failed Edit Follow-Up interviewing, and the loss of one monthly panel due to the Federal Government shut down in October 2013. For more information, see: User Notes

While the 2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2013 American Community Survey

Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

In data year 2013, there were a series of changes to data collection operations that could have affected some estimates. These changes include the addition of Internet as a mode of data collection, the end of the content portion of Failed Edit Follow-Up interviewing, and the loss of one monthly panel due to the Federal Government shut down in October 2013. For more information, see: User Notes

Questions for "wage and salary" and "tips, bonuses and commissions" were asked separately for the first time during non-response follow-up via Computer Assisted Telephone Interview (CATI) and Computer Assisted Personal Interview (CAPI). Prior to 2013 these questions were asked in combination, "wages, salary, tips, bonuses and commissions."

The Census Bureau introduced an improved sequence of labor force questions in the 2008 ACS questionnaire. Accordingly, we recommend using caution when making labor force data comparisons from 2008 or later with data from prior years. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the "Evaluation Report Covering Employment Status" at [http://www.census.gov/acs/www/Downloads/methodology/content\\_test/P6a\\_Employment\\_Status.pdf](http://www.census.gov/acs/www/Downloads/methodology/content_test/P6a_Employment_Status.pdf), and the "Evaluation Report Covering Weeks Worked" at [http://www.census.gov/acs/www/Downloads/methodology/content\\_test/P6b\\_Weeks\\_Worked\\_Final\\_Report.pdf](http://www.census.gov/acs/www/Downloads/methodology/content_test/P6b_Weeks_Worked_Final_Report.pdf). Additional information can also be found at <http://www.census.gov/people/laborforce/>.

While the 2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
